Dear Akain:

We have barely gotten over the excitement of our last trip, when we saw you, and now we're packing off for Melbourne Australia. We'll be down there about 3-4 months, as we must have told you about.

So we're madly busy again, packing and trying to finish some last minute writing, and all the usual....

We had some unprofessional but charming pictures, and thought you might like to have copies— they are enclosed.

We will only be at the other end of the world in Melbourne, and the mail gets there surprisingly fast. The office here will forward 'Aerogrammes' promptly.

Esther and I had a wonderful time during our European trip, thanks in part to your hospitality, and we're looking forward to our next. There is an unlikely possibility that we will return from Melbourne via India and Europe in mid-November, and it is definitely planned that we shall be going to the Stockholm congress of microbiology in August '58. If not sooner, perhaps we shall see you then.

With all the best,

Joshua Lederberg
